Summary

Full-Stack Software Engineer, strongest in React, Node.js and modern JavaScript, who builds and runs multi-tenant SaaS products from requirements to production. Founder of **POSitive**, a live billing platform for food businesses backed by **960+ automated tests**. At GroupTakey, leads development of five subscription products that serve **100+ paying businesses** and earn **over INR 10 lakh a year**, and at Friendly Infotech has delivered **10 client projects in 17 months**.

Skills

Frontend: React, JavaScript, HTML/CSS, Tailwind, SCSS, Framer Motion, Zustand, TanStack Query, React Hook Form
Backend & Data: Node.js, Express, REST, GraphQL, Socket.io, JWT, Zod, Prisma, Mongoose, MongoDB, MySQL, PHP
AI Tools: Claude Code, Claude and GitHub Copilot for code generation, refactoring, test writing, code review and debugging
Testing & DevOps: Vitest, Supertest, load testing, Vite, Git, GitHub auto-deploy, AWS S3, Linux VPS, Hostinger, Netlify
Engineering: Multi-tenant SaaS, RBAC, offline-first with IndexedDB, Razorpay, Firebase, security, Core Web Vitals

Product

POSitive | *Founder & Software Engineer* **Jul 2026 – Present**
Tech: React, Node.js, Express, Prisma, MySQL (MariaDB), Vitest, Supertest

- Built and launched **simplypositive.app**, a multi-tenant billing SaaS with counter billing, UPI QR ordering, kitchen screen, waiter phones, recipe-based stock and a multi-outlet view, now onboarding a **6-outlet food chain as first customer**.
- Built for weak networks and low budgets: **offline billing** that syncs on reconnect, atomic stock updates, an HTTP pulse instead of WebSockets on shared hosting, and MySQL through Prisma so a PostgreSQL move stays simple.
- Secured the platform with TOTP two-factor login, strict CSP, rate limiting, HMAC-verified payment webhooks and 180-day audit logs per CERT-In directions and the DPDP Act, plus role-based access for owners, managers, cooks and waiters.
- Shipped with **960+ automated tests** against a real MariaDB database and a **100-outlet load test at 3x lunch peak**: 6,300+ requests, **zero errors** and 95th-percentile responses under 90 ms on a 5-connection database pool.
- Reached **100 desktop and 98 mobile** on Lighthouse with a 2.1 s mobile LCP and built a Super Admin console for plans.

Experience

GroupTakey | *Software Engineer (Contract)* | *Letter* **Nov 2025 – Present**

- Led end-to-end development of five SaaS products on a **revenue-share contract**: Billants (GST billing), Beyond Healthcare (hospital management), Supervision (school ERP), Auctison (live auctions) and Cyber Desk (event check-in).
- Designed a **multi-tenant architecture** with a separate database for each customer, role-based access and daily backups, on MySQL and MongoDB, and built core modules for GST billing, patient records, real-time bidding and barcode check-in.
- Chose React with Node.js for heavier products and PHP with MySQL for lighter ones, because Hostinger's Business plan runs PHP and MySQL natively but allows only five Node.js apps, and moved products to VPS servers as load grew.
- Led the team on selected products, planned roadmaps from customer feedback and sped up delivery with Claude Code.
- Together they serve **100+ paying businesses** with **1,000+ staff logins** and earn **over INR 10 lakh a year** in revenue.

Friendly Infotech | *Software Engineer (Freelance)* | *Letter* **May 2025 – Present**

- Delivered **10 client projects in 17 months** across healthcare, real estate, financial services and business, including Medi Panel, Sparsh Hospital, Sofia HMS, Wasi Property and Shree Dhankuber, as the clients' primary technical contact.
- Turned business needs into scope and architecture, chose MERN or LAMP by budget, designed databases and REST APIs.
- Handled testing, releases, hosting, domains and DNS for each project, plus fixes and improvements after launch.

Icon Websolution | *Web Developer Intern* | *Letter* **Oct 2023 – Mar 2024**

- Delivered **4 websites in 6 months** for healthcare, pharma and education clients, including Maa Multicare Hospital.
- Ran theme customisation, responsive layouts and on-page and off-page SEO on several live client projects at the same time.

InfoLabz IT Services | *Web Developer (Industrial Training)* | *Certificate* **Jun 2021 – Apr 2022**

- Built PHP and MySQL web applications on live in-house projects over an **11-month industrial training** programme.
- Designed responsive pages with HTML, CSS, JavaScript and Bootstrap and wrote the server-side logic and database queries.

Education

Silver Oak College of Engineering & Technology, Silver Oak University **Aug 2022 – May 2025**
B.Tech (Lateral Entry), Computer Engineering | *CGPA 9.19* *Ahmedabad, Gujarat*

Government Polytechnic Ahmedabad, Gujarat Technological University **Jul 2019 – May 2022**
Diploma, Computer Engineering | *CGPA 9.44, First Class with Distinction* *Ahmedabad, Gujarat*
